Telephone number (optional): (702) 248 4274

I request that these comments be made a part of the official record.

1 What constitutes a disqualifying condition or factor for the Yucca Mountain site and what specific conditions at Yucca Mountain would cause you to recommend the site be disqualified?

Since DOE has now acknowledged that the groundwater travel time at Yucca Mountain is so short that it meets the disqualifying condition in DOE's own siting guidelines, why hasn't Yucca Mountain been disqualified under the provisions of the Nuclear Waste Policy Act?

2 Will one of the three thermal load alternative designs in the EIS be the actual repository design the DOE will submit to the NRC for license application? If not, will there be an EIS supplement?

How will the EIS deal with the currently discussed possible range of time between waste emplacement and repository closure of 50 to 300 years?

3 If we do not stop Yucca Mountain  
Las Vegas could end up an  
undesirable place to live. Raising  
families in an environment that  
could cause toxic, by one accident  
will turn families and people  
away as well as endangering the  
lives of the people who live here!  
Please stop Yucca Mountain!

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

our lives depend on  
it!
